JENS FAGER

Jens philosophy - Everything is and will be different. The core that permeates every single project, is treating them all in a honestly way and highlight their main function. The second part is that we always add a sense of humour, poetry or surrealism. The conclusion of it all ends up in a natural product, both for the producer and the consumer.

Our field of works stretches from smaller architecture, interiors for restaurants stores, offices and also product design. Everything is about everyday life and our essential needs for daily experiences.
